CATALOGUE 2025

Wavy Cabin

To meet the increasing demand for design and quality in modern cities, DEBO® has developed a curved restroom partition system. The curved design of the cubicles is the basis for the interior space, creating a partition door and a variation of the design with different curves and arcs on both sides, thus DEBO® is favored by contemporary urban Grade A office buildings, five-star hotels, super luxury shopping malls, theme hotels and clubs ,etc.

► Grade A Office

► Guangqi Future Centre, Shenzhen China

► Shirble Department Store, Shenzhen China

Highlight

Different from the traditional restroom partition style, Wavy Cabin puts more emphasis on space layout and design experience, it has the following unique product performance.

Curve Design
