SMART WORKING AREA
OASI DIGITALE

Le projet Digital Oasis consiste en un pod intelligent, auto-alimenté par des panneaux solaires, qui peut accueillir jusqu'à six personnes. Il leur fournit un poste de travail ainsi que de l'électricité pour alimenter leurs ordinateurs portables.
Il s'agit d'un belvédère destiné à être installé dans les parcs publics municipaux à la place des pergolas classiques en bois, ou dans des lieux inaccessibles à l'électricité (par exemple, les montagnes, les endroits isolés, les plages).
Le projet est conçu pour répondre à la tendance croissante des nomades numériques et du travail intelligent en général. Il est proposé à toutes les réalités publiques ou privées qui décident d'offrir un poste de travail en plein air à ceux qui ont la possibilité de travailler à distance (indépendants de toutes sortes, professionnels de l'informatique, nomades numériques, rédacteurs, vlogueurs, blogueurs de voyage, blogueurs à vélo, et tous ceux qui ont besoin d'un support à l'ombre et d'un réseau électrique pour pouvoir faire leur travail via un PC, y compris les étudiants.
Afin de faire de cet appareil un véritable bureau de plein air, il peut être équipé d'une connexion Internet via un slot 4G (PAS DE RESTRICTIONS D'ACCÈS) et d'un module d'accès wi-fi à partir duquel il est possible de gérer la maintenance et de surveiller le fonctionnement du réseau et les éventuelles anomalies via un simple tableau de bord.

SMART POD

The Digital Oasis project consists of a smart pod *self-powered by solar panels, which can accommodate up to six people. It provides them not only with a workstation but also with electricity to power their laptops. It is a gazebo to be installed in municipal public parks instead of classic wooden pergolas, or in places inaccessible to electricity (such as in mountains, beaches or remote places).*
The project is designed to meet the growing trend of digital nomads and smart working in general. It is proposed to all those public or private entities that decide to offer an open-air workstation to those who have the possibility of working remotely (freelancers of all kinds, Computer Scientists, Digital Nomads, Copywriters, Vloggers, Travel Bloggers, Bike Bloggers, and all those who need support in the shade and a power grid to be able to do their work through a PC, including students.
In order to make this device a real outdoor office, it can be equipped with Internet connection through 4G Slot (NO ACCESS RESTRICTIONS) and wi-fi access module from which you can manage maintenance and monitor any anomalies, including network operation, through a simple dashboard.
