# Product range to suit every requirement

Clever solutions for numerous industries and sophisticated product details are the result of continual improvement work.
Thomas Bopp,
Sales Manager

## Lockers

With our wide range of products as well as extensive designs and equipment, we can offer the right solution for every requirement, from the classic locker to the bespoke solution.

## Lockboxes and safe deposit boxes

The lockboxes and safedeposit boxes are

space-saving and particularly sturdy. They offer the user a safe place for the small but valuable things in life.

## powerBox charging station

Thelockboxes with power supply are the perfect solution for charging batteries and storing them securely at the same time. Each compartment offers fused power connections.

## Bench seats

The bench seat range impresses with its functions and design – from the classic bench seat to the stylish cube seat.

## Partition walls and cubicles

OurWC partition walls as well as our shower and changing cubicles are

matched to the complete product range in terms of colour and design. We can always develop customer-specific solutions.

## Accessories

Phone points, shelves, storage racks and coat hook racks round off the product range and can be accounted for during the planning with the client.

IXOS P with HPL door, thickness 13 mm

TYPO R cloakroom locker in a custom colour and with number plates

TYPO R stainless steel hinge and sturdy middle post

TYPO R clothes rail with double hooks

# IXOS ®P HPL design

The IXOS P locker consistsofHPL solid core panels thatare assembled on site quickly and easily using special aluminium profiles in an innovative plug-in design. The IXOS P stands out with it’s rugged design details, water resistance, ease of cleaning and high burglar resistance.

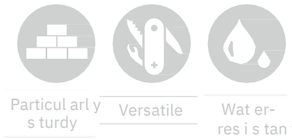

Depending on use, a single- or two-part construction or implementation as a Z-locker is possible. The latter saves space and still offers room for long garments. Thanks to the customised interior fittings, IXOS P is extremely versatile.

# TYPO R aluminium body

Thecabinetbody of the TYPO R ismade ofenvironmentally friendlyand seawater-resistant aluminium. The special press-fitting process gives the form-fit metal body maximum rigidity and corrosion-protection. There is a choice of HPL or glass doors.

Thealuminium doorsare coated with the scratch-resistant Crystal Coat paint surface. TYPO R also offers industry-specific equipment solutions. From customised closure variants to innovative ventilation concepts.

TYPO S cloakroom locker with glass doors in custom colours and bench seat installed in front

TYPO S with HPL door and fixed partition wall

powerBox with PIN lock

powerBox service compartment for maintenance work

powerBox safety power strip

# TYPO S steel body

TYPOSis theproven solutionwith a galvanised steelbody withsealed voids. The special press-fitting process gives the metal body maximum stability and corrosion-protection. That's why we offer a 20-year corrosion protection guarantee on this product. There are three cabinet door solutions for TYPO S: steel, HPL or glass.

Customer-specific interior equipment such ashelmethooks, fixed partition wall and cabinet ventilation are also possible with TYPO S.

Sturd y Versatile Low cost

# powerBox lockboxes with power

ThepowerBox lockboxesare theperfect solution for charging batteries whilstalso storing them securely. Each compartment isequipped with two power sockets and two USB ports, so that e-bike batteries, smartphones, tablets and laptops can be charged.

Thesafety package consistsof a protection plug with earth leakagecircuit breaker. The standard burglar resistance protects against theft and vandalism. The cabinet body is made of aluminium. The doors are made of sturdy HPL.

Particularly s turdy Electrified Clever

Our commitment goes well beyond planning and production. We take care of all logistical tasks up to the professional installation by fitters.
Christoph Glaunsinger,
Key Account Manager

# Doors and locks - individual and flexible

**TYPO S cloakroom lockers** with enamelled glass doors

## Materials

We offer a product portfolio featuring numerous materials which are perfectly matched to each other. We find the right material for every requirement and every budget.

– HPL (High PressureLaminate)
HPL is high-pressure laminate consisting of layers of paper that are pressed under high pressure to form extremely tough panels. HPL is of a high quality, hygienic, suitable for wet rooms and heat-resistant.

– Glass
T empered safety glass is used for the cabinet doors. Glass stands out for its sophisticated appearance, stability and ease of cleaning.

– Door equipment
- Numbering by engraving/plate
- Letter box
- Ventilation slots
- Plexiglass window (HPL only)
- Others on enquiry

– Steel
Steel cabinet doors are resistant to scratching and abrasion. Galvanisation with aluminium gives the steel lockers increased corrosion resistance.

– Derived timber product
Wood-based lockers are made from sustainable raw materials.

- Helmet holder
- Sturdy hook for fire brigade belt
- Internal valuables compartment with drop-in slot

Towel hook

Fixed partition wall

Shelves for shower utensils

Movable double hooks

Extendable clothes rail

# Climate ideal ventilation concept

Forced ventilation through connection to building's exhaust system

A clever ventilation concept offers lots of added value: Amongst other things, it prevents unpleasant odours and helps to dry clothes quickly.

- Self-ventilation
  All models are designed to ensure a permanent air exchange. This is achieved via a recessed lid and base or via ventilation perforations in the rear panel or door. The air exchange can even be increased with an additional perforated floor.

- Electronicfan
  To increase the air exchange and, above all, to speed up the clothes drying process, the locker can be fitted with an electronic fan that constantly expels moist air from the locker.

- Forcedventilation
  For ideal air exchange and a perfect room climate, connection to a building exhaust system is recommended. An adjustable disc valve in the roof is used for the connection. Alternatively, the air duct can be routed in the inclined roof. Our recommendation: with a ceiling-high HPL cover, the ventilation pipes can be elegantly concealed.

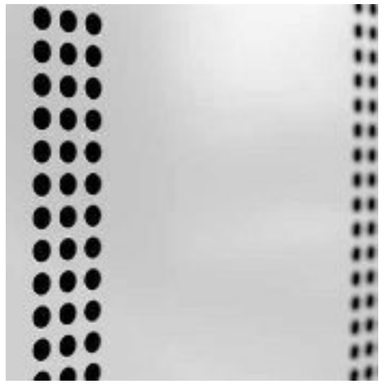

Electronic fan for active air exchange

Disc valve

Ventilation perforation in the rear panel

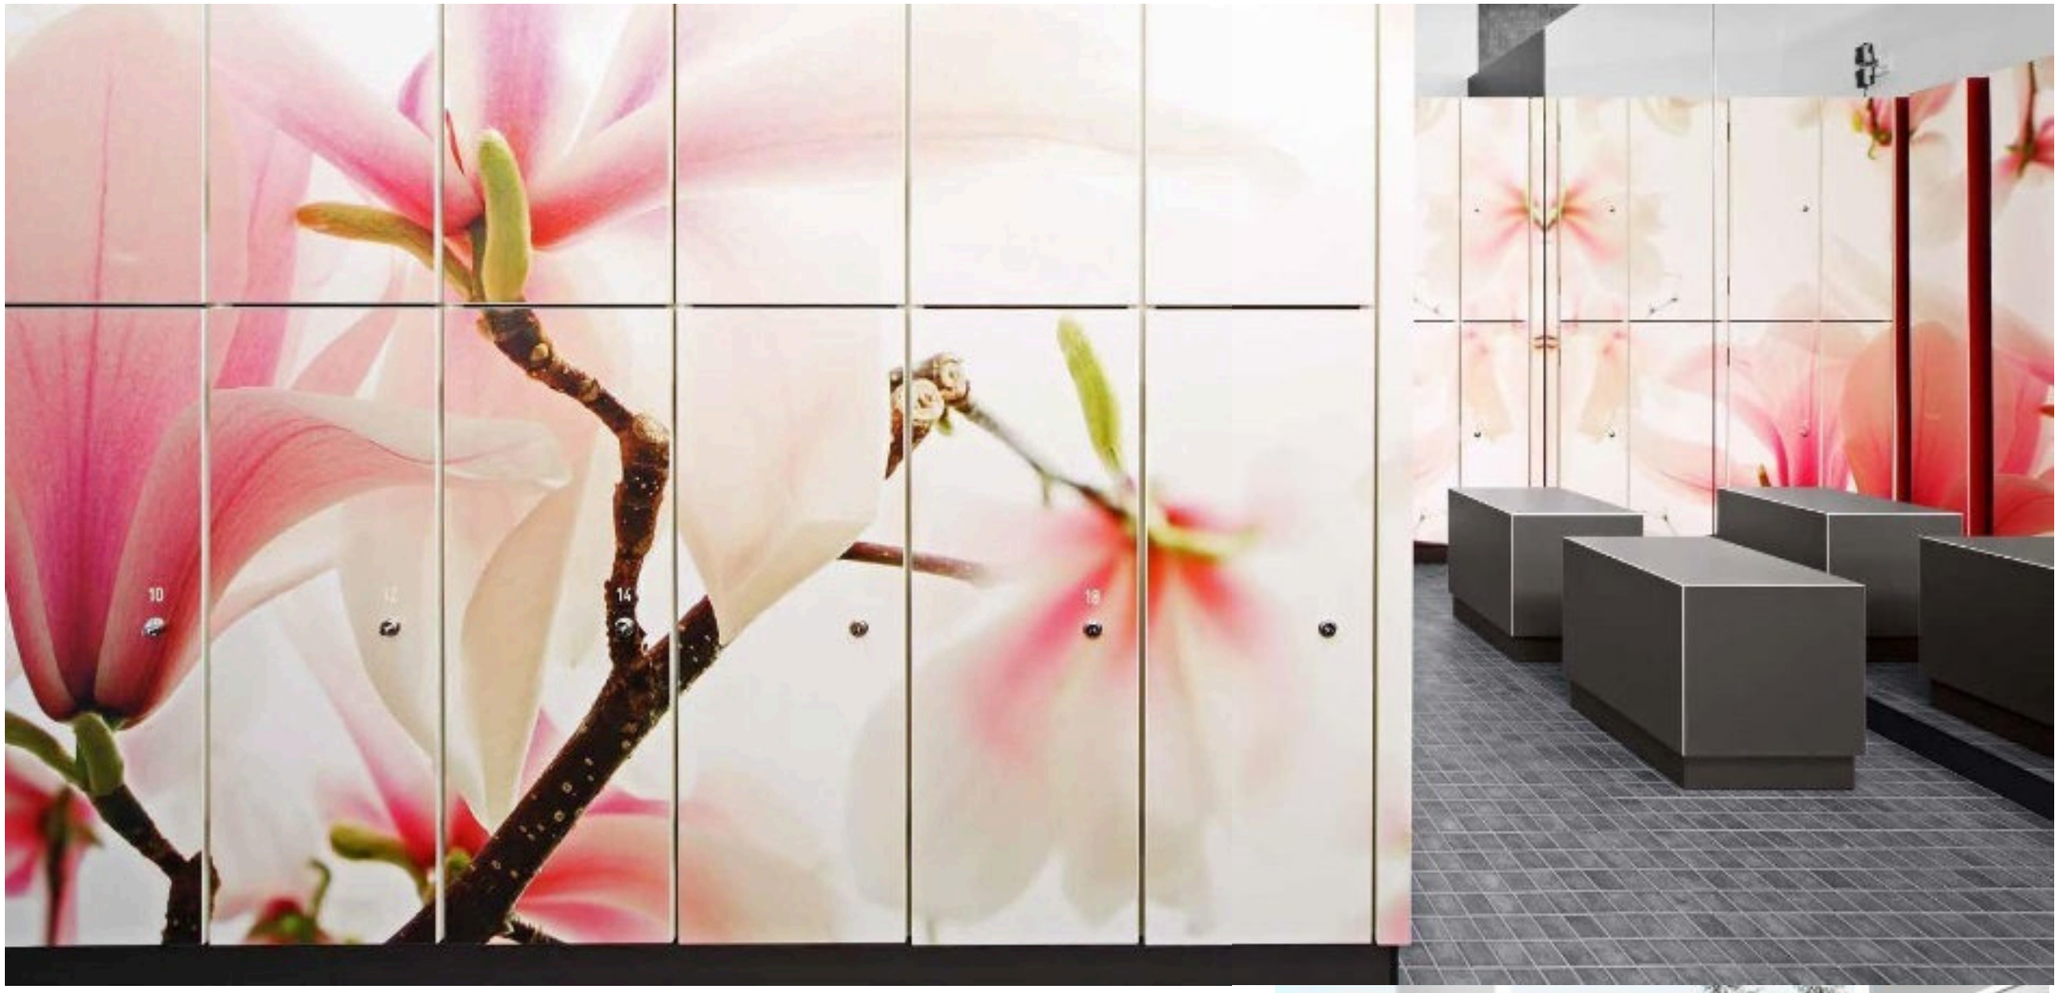

Perforated sheet metal door for ventilation

Self-ventilation in the floor

# Surface design real eyecatchers

IXOS P cloakroom lockers with individual digital print

Using individual digital and foil prints as well as different wood decors or special colours, your lockers and lockboxes can be turned into real works of art!

– Digital print
These can be implemented very well on HPL doors. Unique changing rooms with a special design are created. There are no limits to your imagination when it comes to motifs. Whether abstract symbols, lettering, company logos or fantastic photo prints: A customised digital print perfectly complements sophisticated room concepts and gives rooms a special touch.

– Foil print
Foil print is possible on any surface – over a large area or as a detached motif. We are happy to consider your individual design right from the planning stage.

– Wood decor and specialcolours
On request, we also offer various wood decors and monochrome special colours.
