CODELOCKS

MECHANICAL CODELOCK

2800 SERIES

UNIQUE COMBINATIONS: 10,000

The 2800 mechanical combination lock with up to 10,000 unique combinations. The lock offers a wide range of possibilities, including public and private mode. Setting the user's own PIN code and changing it in private mode at any time is enabled by a mechanical button. The code search function requires the use of a service key, which allows emergency access in the event of loss or forgetting the code (works in public and private mode).

AVAILABLE COLOUR OPTIONS:

ATTENTION: the mode **MUST** be specified at the time of ordering!
This lock has NO possibility to switch between modes!

MODE: PUBLIC OR PRIVATE

PUBLIC (FOR VISITORS)
PRIVATE (FOR REGULAR USERS)

ELECTRONIC CODELOCK

3780 SERIES

The 3780 digital combination lock is a multifunctional lock that eliminates the need for keys. The lock includes led indicators, a sound-activated keypad and a battery status indicator with appropriate information when the battery needs replacing. Public and private modes are available as standard. In public mode, the lock has an auto-open function after a certain time has elapsed since closing (from 1 minute to 999 minutes). If the code is lost, it is possible to open the lock using the service key. The lock is powered by two AA batteries. Horizontal and vertical versions are available in silver and black. An optional door-opening alarm and the placement of a personalised logo on the lock are available.

STANDARD

3781 SERIES

The 3781 digital combination lock for wet areas has an IP 65 rating and is water resistant. It is suitable for use in wet and chlorinated environments. The lock includes led indicators, a sound-activated keypad and a battery status indicator with relevant information when the battery needs replacing. Public and private modes are available as standard (up to 50 private user modes). In public mode, the lock has an auto-open function after a certain amount of time has elapsed since closing (from 1 minute to 999 minutes). If the code is lost, it is possible to open the lock with the service key. The lock is powered by two AA batteries. Horizontal and vertical versions are available in silver and black. An optional door opening alarm and the placement of a personalised logo on the lock is available.

RESISTANT TO
CHLORINE AND HUMIDITY

3950 SERIES

The 3950 HORIZON digital combination lock is equipped with a touchscreen numeric keypad. Operation of the lock is very simple thanks to the remote code management function from the 'cloud' configuration portal. The lock can operate in private and public mode, enhanced with remote management functions. It includes a coloured operation indicator ring available in red or green, a sound-activated keypad and a battery status indicator to indicate when the battery needs replacing. If the code is lost, it is possible to open the lock using the service key. The lock is equipped with a CR123 lithium battery and complies with ADA / DDA security standards. It is available in a vertical version in black.

CLASSIC

LOCKS SECURED WITH A PADLOCK

4441 SERIES

STANDARD

Required diameter of padlock bow: 5- 7 mm

The 4441 padlock lock is the basic padlock used in Malow furniture. The 4441 series is a timeless design at an affordable price. The lock is in a glossy chrome nickel finish. The solution is perfect for schools.

A208 SERIES

INHERENTLY SAFE

Required diameter of padlock bow: 5- 7 mm

The A208 free rotation padlock lock is a high security solution. When the padlock is closed, the knob rotates 360 degrees, making the lock impossible to pick and break. The metal lock is available in black. This is a dedicated solution for offices and cloakrooms in public areas.

CYLINDER LOCKS CLOSED WITH A KEY

C702 SERIES

The C702 cam lock is the basic lock used on the WSU, MSU furniture. The head of the lock is finished with polymer in black. A sufficiently large number of combinations and resistance to physical damage make the C702 lock an optimum value for money. The key can only be removed in the locked position. 2 keys included.

COMBINATIONS: 2000
MASTER SYSTEM
STANDARD

B671 SERIES

The B671 series lock is a popular solution with pleasing aesthetics. The lock head is finished in nickel and chrome. The number engraved on the lock matches the number on the key. Supplied with 2 keys.

COMBINATIONS: 2000
MASTER SYSTEM
AESTHETICALLY FINISHED

SERIA B604

The B604 series lock is suitable for use in furniture with small doors. It takes up very little space due to its short body. The glossy chrome finish adds to its aesthetics. It is used by default in the WSS family of telephone cabinets. Complete with 2 keys.

COMBINATIONS: 2000
MASTER SYSTEM
FOR SMALL LOCKERS

0952 UGL SERIES

The 0902 lock is an advanced solution used by default in laptop cabinets. Aesthetic design, 10,000 combinations and the use of dust protection make the 0952 lock a leader in its class. Lock in chrome finish. The 3 mm thick serpentine notch key is made of brass (better resistance to moisture). Great for use wherever security is important.

COIN DEPOSIT LOCKS

2786 SERIES

The 2786 deposit lock with sliding bolt is an economical and secure return coin lock in a robust plastic housing. The 2786 series is used in dry areas. For damp areas, the counterpart of the 2788 series is designed. It is suitable for 2 PLN or 1 EUR coins as standard. Additionally, it can be equipped with a coin hopper (non-returnable version). With the service key, the lock has a replaceable cylinder- this means that in the event of a failure, the entire housing does not have to be changed. In addition, a master key is available.

COMBINATION AND DEPOSIT LOCKS

2112 SERIES

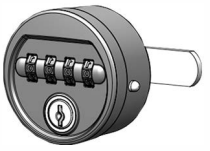

PUBLIC MODE

The 2112 Series mechanical combination locks come in private mode. The lock is operated by an external rotating ring, so the row of numbers can always be read.

1401 SERIES

PRIVATE MODE

The 1401 Series mechanical combination locks come in private mode. The lock housing is made of easy-to-clean reinforced fibreglass and plastic.

1606 SERIES

Deposit locks for 5 PLN or 1 EUR coins from the 1606 series are characterised by a mechanism located on the front of the door. The strong claws holding the coin in the lock will not release it even if tools are used. An additional function is the protection against breaking the key.

DEPOSIT LOCK

COINS 5 PLN OR 1 EUR

REMOTE TECHNOLOGY

SOLA RFID

The SOLA RFID electronic lock allows you to store your belongings safely and easily. RFID technology allows the lock to be opened with a pre-programmed card, key, key fob, special chip sticker or wrist bracelet. The lock can be programmed to work with existing employee cards (provided the two systems can be configured with each other). The lock has visual and audible indicators for ease of operation. It works in private mode (one user operates one lock) and public mode (multiple users can use one lock). Coding is very easy, using a special programming key. The lock is resistant to moisture and dust (protection level IP55). A brushed nickel finish adds to its aesthetics.

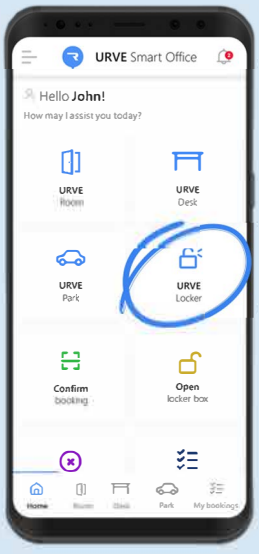

ALSO AVAILABLE:

SOLA KEYPAD

The SOLA KEYPAD is an advanced electronic combination lock. Resistant to moisture and dust (IP55). It operates in public and private mode. It is characterised by impeccable aesthetics and workmanship.

URVE SYSTEM

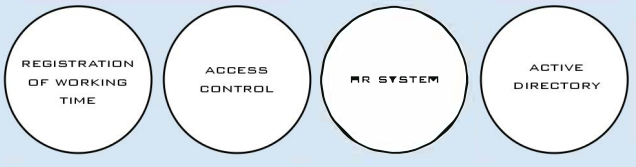

LOCKER RESERVATION

WITH MOBILE APP OR RFID CARD
