Concepita per vivere lo spazio pubblico rispettando la nostra Filosofia di città positiva, sostenibile, la Soléane Smart bench è l'eccellenza nata per offrire al fruitore un esperienza sempre più completa.
Abbiamo unito a una panchina dal design moderno nuove soluzioni tecnologiche, quali alimentazione da energia rinnovabile, ricarica dei dispositivi informatici, illuminazione intelligente e connessione alla rete Internet.
Le nostre panchine sono costantemente monitorate telematicamente e tutte le funzioni sono controllabili tramite il nostro intuitivo portale web, direttamente dal cliente finale.
Soléane, nella sua versione standard, non richiede nessun cablaggio elettrico aggiuntivo e l'unico requisito di installazione è una zona all'aperto. Tutte le componenti elettroniche sono racchiuse in involucri stagni e I punti di connessione sono sicuri e resistenti agli agenti atmosferici.
È sicura perché controllata da sensori che la proteggono da corto circuito, e tutta la componentistica è regolata dalle severe normative europee, garantendo al manufatto la marcatura CE.
Totalmente MADE IN ITALY, dalle dimensioni contenute e dal design accattivante, la Soléane è una panca che si adatta a tutte le esigenze, inglobandosi completamente nel contesto urbano.

SOLÉANE

SMART BENCH

Conceived to live the public space respecting our philosophy of positive, sustainable city, the Soléane Smart bench is *the excellence born to offer the user an increasingly complete experience;*
We have combined a modern design bench with new technological solutions, such as renewable energy, IT device charging, intelligent lighting and connection to the Internet.
Our benches are constantly monitored electronically and all functions can be controlled through our intuitive web portal, directly from the end customer. Soléane, in its standard version, requires no additional *electrical wiring and the only installation requirement is an outdoor area. All the electronic components are enclosed in sealed enclosures and the connection points are safe and resistant to atmospheric agents.*
It is safe because it is controlled by sensors that protect it from short circuit, and all the components are regulated by the strict European standards, guaranteeing the product the CE marking.
Totally MADE IN ITALY, with contained dimensions, and with an attractive design, the Soléane is a bench that adapts to all needs, being completely incorporated into *the urban context*

Il progetto Auréal consiste in un gazebo smart, autoalimentato con dei pannelli solari, che può accogliere fino a sei persone. Fornisce loro, oltre alla postazione di lavoro, anche l'energia elettrica per alimentare i propri laptop.
È un gazebo da installare nei parchi pubblici comunali al posto dei classici pergolati in legno, o nei luoghi inaccessibili alla corrente elettrica (ad esempio in montagna, luoghi remoti, spiagge).
Il progetto è pensato per soddisfare il crescente trend dei nomadi digitali e dello smart working in generale. Viene proposto a tutte quelle realtà pubbliche o private che decidono di offrire una postazione di lavoro all'aria aperta a coloro che hanno la possibilità di lavorare da remoto (liberi professionisti di ogni genere, Informatici, Nomadi Digitali, Copywriter, Vlogger, Travel Blogger, Bike Blogger, e tutti coloro i quali hanno necessità di un supporto all'ombra e di una rete elettrica per poter svolgere il loro lavoro attraverso un pc, inclusi gli studenti.
Al fine di rendere questo dispositivo un vero e proprio ufficio all'aperto, è possibile dotarlo di connessione Internet attraverso Slot 4G (NO RESTRIZIONI DI ACCESSO) e di modulo di accesso wi-fi dal quale poter gestisce la manutenzione e monitorare tramite semplice dashboard il funzionamento della rete e le eventuali anomalie

AURÉAL

Smart gazebo

The Auréal project consists of a smart gazebo,
self-powered by solar panels, which can accommodate up to six people. It provides them not only with a workstation but also with electricity to power their laptops.
It is a gazebo to be installed in municipal public parks instead of classic wooden pergolas, or in places inaccessible to electricity (such as in mountains, beaches or remote places).
The project is designed to meet the growing trend of digital nomads and smart working in general. It is proposed to all those public or private entities that decide to offer an open-air workstation to those who have the possibility of working remotely (freelancers of all kinds, Computer Scientists, Digital Nomads, Copywriters, Vloggers, Travel Bloggers, Bike Bloggers, and all those who need support in the shade and a power grid to be able to do their work through a PC, including students.
In order to make this device a real outdoor office, it can be equipped with Internet connection through 4G Slot (NO ACCESS RESTRICTIONS) and wi-fi access module from which you can manage maintenance and monitor any anomalies, including network operation, through a simple dashboard.

OASI DIGITALE
CITYSI

oasi digitale

smart shelter

A fully self-sufficient outdoor office designed to enable remote work and outdoor study in total comfort. Oasi Digitale accommodates up to six people, providing high-speed internet connectivity, clean energy, and ergonomic workstations seamlessly integrated into the urban environment. Your Outdoor Office: Functionality and Connectivity. Integrated Wi-Fi Hotspot: Transforms public space into a connected workspace for all users. Flexible & Tailored Connectivity: The Wi-Fi system can operate via a 4G/5G SIM slot or an Ethernet-connected router. The network architecture is fully adaptable and customizable to meet the end client's specific needs. Power & Fast Charge: Workstations equipped with continuous power supply for laptops, tablets, and smartphones.

🔋 **Continuous Power & E-Bike Charging (Hybrid & Always-On):**
In addition to primary power from photovoltaic panels, Oasi Digitale can connect directly to the urban power grid. This ensures 24/7 service continuity, even on days with little sun or in areas with low solar exposure. E-Bike Charging (Optional): When connected to the grid, the structure can be fitted with Schuko sockets for charging electric bicycles, enhancing sustainable mobility services within the urban space.

✨ **Key Strengths & EPD-Certified Sustainability:**
Features an Environmental Product Declaration (EPD), guaranteeing maximum sustainability and transparency regarding the product's lifecycle. Modular and Circular Design: Structure made of 100% infinitely recyclable carbon steel with zero-impact coating (Qualicoat 2). Components are easily repaired or replaced individually. Accessible and Inclusive: Designed to eliminate architectural barriers, ensuring full wheelchair accessibility.

USB CHARGING STATION

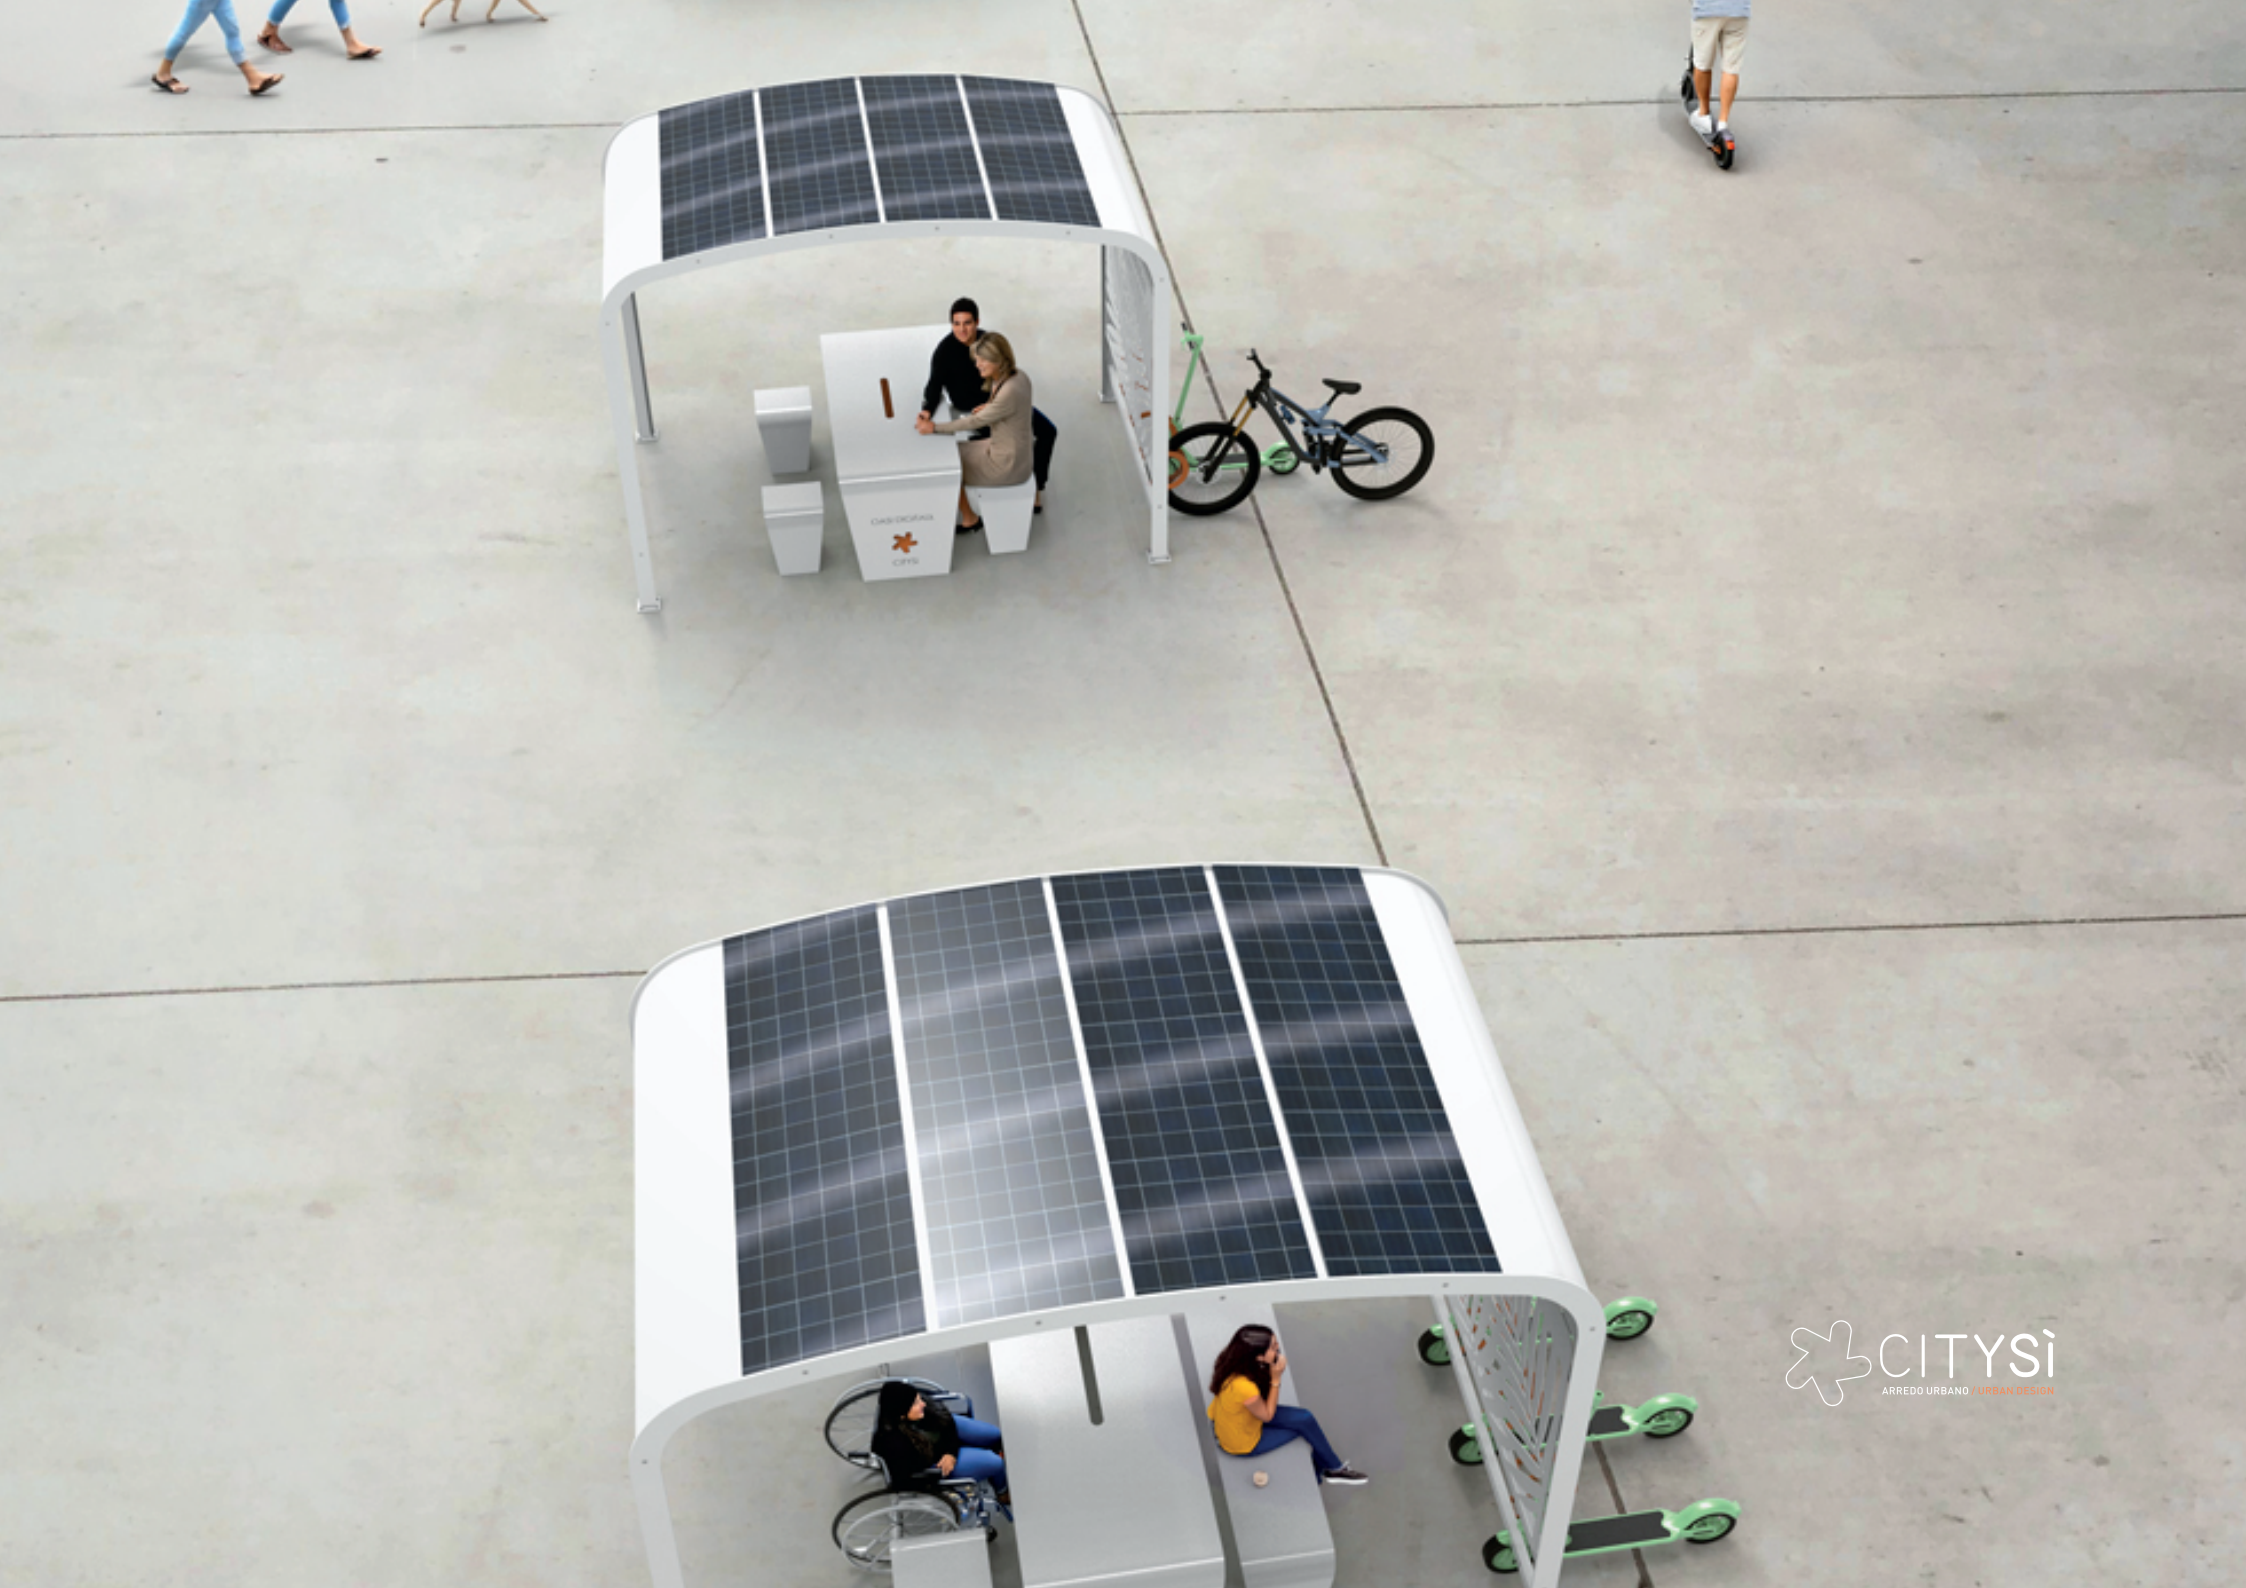

OASI DIGITALE
CTTG

Why choose it?
It transforms public spaces, university campuses, and corporate parks into genuine outdoor work hubs, combining the flexibility of smart working, EPD-certified sustainability, 24/7 energy efficiency, and a durable, modular Italian design.
